

KA-210-VET Partner Identification Form

Participating Organizations

Please note that the PIC code is a unique identifier for the organization within the whole Erasmus+ Programme. It should be requested only once per organization and used in all applications for all Erasmus+ actions and calls. Organizations that have previously registered for a PIC should not register again. If an organization needs to change some of the information linked to the PIC, this can be done through the Participant Portal.

Partner Organization

PIC/OID	940967707

If the address is different from the one of the organizations	
Background and Experience	
<p>Please briefly present the organization/group (e.g. its type, scope of work, areas of activity and if applicable, approximate number of paid/unpaid staff, learners and members of the group). (0/4000 characters)</p>	
<p>Elevate Health (ELV, The Netherlands), established in 2013, has been at the forefront of long-distance learning in the field of health sciences, with a focus on epidemiology and clinical research. Through the Elevate Academy (https://elevatehealth.eu/) over 15,000 health professionals across the globe have been able to follow online courses to enhance their knowledge and thereby contribute to the improvement of health worldwide.</p> <p>In addition to the course offerings, ELV has participated in several international consortia ranging from Horizon 2020 to Erasmus Plus programmes (https://elevatehealth.eu/solutions/international-consortium-partner/). An example of an Erasmus+ Capacity Building in Higher Education grant programme is HEALTH-I (http://healthindonesia.eu/), coordinated by UMC Utrecht and the Capacity Strengthening in Epidemiology and Public Health project (CATAPULT, Nuffic OKP-TMT+.20/00122). In this, EH has partnered with experts from UMC Utrecht to design and develop an online curriculum in Public Health at the Asian University of Women in Bangladesh. EH supervised and trained the local faculty of AUW on online education (train-the-trainer, 'how to develop' courses) and provided training of IT personnel on e-learning environment development to facilitate online learning (considering internet access, e-learning equipment needs).</p> <p>Elevate is the digital learning & dissemination spin-off of the Utrecht University & Utrecht University Medical Center. Elevate believes in empowering healthcare professionals worldwide, through high-quality learning solutions. Therefore, we work on a daily basis on EU-funded public-private partnerships in the Life Sciences and Health sector. Elevate consists of a team of passionate online learning experts, including instructional designers, media experts and project managers. As educational specialists, the experts of Elevate have insights into the needs of trainers and moderators when it comes to teaching online.</p>	
<p>What are the activities and experience of the organisation in the areas relevant for this project? What are the skills and/or expertise of key persons involved in this project? Please explain how the organisation brings an essential added value to the project. (0/4000 characters)</p>	
<p>Elevate (ELV, The Netherlands) is a social enterprise currently consisting of sixteen educational scientists specialised in blended learning. EH specialises in developing innovative educational solutions in health care delivery in different settings including in low and middle-income country contexts. EH's expertise in the development and implementation of high-quality online and blended innovative learning solutions and provision of technical and didactical expertise will be critical. The company has an excellent track record of successful contributions to European public-private</p>
